System of Survival are one of the longest collaboration and pivotal figure to emerge in the Italian underground club scene. With a dj career that spans almost over two decades and has seen them build up a huge reputation, through their performances in top clubs, they are one of the first acts to gain a continuing residency at Circoloco, the now legendary Monday morning party which is held at the world famous DC10 club in Ibiza. Over the years, System of Survival have remained committed to their purist notions of what good dance music should be, continuing to create a wall of sound which unites venues and clubbers around Europe. System of Survival's sets are a perfect blend of past and present sounds. They themselves have contributed to and expanded these sounds with their skilful productions and collaboration through their releases on some of the most exciting European labels including Lasgun, FreakNChic, Tenax, Vinylclub, Global Underground (Digital), Timewarp and receiving major play/support from the likes of Lasodice, Luciano, Peire Inspirescu, Rhadoo, Josh Wink, Timo Mass, Dan Ghemana, Tobi Neumann, M.A.N.D.Y. etc. In 2008 teaming up with dj producer stalwarts Amor T they have founded the project NVS71 a creative playground of a label whose aim is to promote new ideas in dance music.
