The first instrument I learned was the alto sax. I started playing that in 5th grade, and later that year, I picked up my first guitar, and it just came natural to me. When I entered junior high, I was introduced to Jazz Band. I played guitar in Jazz band from 6th grade, all the way through High school graduation. I was improving very quickly, and even taught myself how to play bass and drums. I studied Jazz INTENSELY all through High school. Senior year I studied Music Theory.

Throughout my years as a musician, I've never been in a band outside of school bands. I've wanted to, but it never happened. I've spent my time writing my own songs, and recording my own music, playing all the instruments.
